Members of the International Paper Review Panel XVII

1 INVITED PAPERS

The culture work of innovating: Getting real about innovating in business 27 ways
Richard Tabor Greene (JP) 3

Cyber-physical systems: Concepts, technologies and implementation principles
Imre Horváth (NL), Bart H. M. Gerritsen (NL) 19

Innovation based on applying design methodology
Iris Graessler (DE), Volker Haas (DE), Wadym Suchowerskyj (DE) 37

Collaborative design: Using CAD kernel in knowledge-based environment
Bernadetta Kwintiana Ane (DE), Dieter Roller (DE) 45

Three views on additive manufacturing: Business, research and education
Jo Geraedts (NL), Eugeni Doubrovski (NL), Jouke Verlinden (NL),
Marnix Stellingwerff (NL) 55

2 UBIQUITOUS SYSTEMS ENGINEERING 69

Smart agent technologies
A distributed, multi-agent crowd simulation system with applications in
construction projects
Kieron Charles Ekron (ZA), Elizabeth Marie Ehlers (ZA) 71

Analysis of a design theory through a multiagent approach
Denis Choulier (FR), Alain Jérôme Fougères (FR), Egon Ostrosi (FR) 85

Ubiquitous environment-based collaborative recommendation system for PLM
Alexander Smirnov (RU), Alexey Kashevnik (RU), Nikolay Shilov (RU) 99
A multi-agent immunological material extraction model for simplifying multi-material telemanufacturing
Jade Anthony Venter (ZA), Elizabeth Marie Ehlers (ZA) 109

Exploiting ubiquitous technologies
Enabling visual content adaptation in context for ubiquitous product concepts visualization
Eliab Z. Opiyo (NL), Imre Horváth (NL) 123
Understanding the affordances of peripheral vision: An exploration within the field of driver assistance
Kanter van Deurzen (NL), Imre Horváth (NL), Bram de Smit (NL) 137
Definition and analysis of a lean communication theory
Adrian Steinemann (CH), Simon Wampfler (CH), Thomas Kennel (CH), Andreas Kunz (CH) 153
Shareworks creative networking for universities through ubiquitous computing
Flip van Haaren (NL), Niels CCM Moes (NL) 163

Enabling ubiquitous applications
Bio-inspiration from leaf surface to solar-cell texture design for light absorption improvement
Ki Sup Lim (KR), Tae-Min Kim (KR), Joo-Pyo Hong (KR) 177
NSFlock: Design evaluation via immunological agents
Duncan Anthony Coulter (ZA), Elizabeth Marie Ehlers (ZA) 187
Applying massive multiplayer online role playing games architecture for collaborative multi-user CAX applications
Joshua Winn (US), Timothy A Bright (US), C. Greg Jensen (US), Chia-Chi Teng (US) 199
Solving social problems using ubiquitous technologies in an educational multi-X design context
Niels CCM Moes (NL), Ricardo Mejía-Gutiérrez (CO), Gilberto Osorio-Gómez (CO) 211

Explorative knowledge technologies
Material design by technomimicry
Wim Poelman (NL), Jacob Alkema (NL), Koen Hermsen (NL) 227
Modular abstract prototyping as an instrument to demonstrate software tool concepts for multiple stakeholders
Els Du Bois (BE), Imre Horváth (NL) 237
Attribute-oriented designing: Knowledge based engineering and synergetics approach
Yuemin Houn (CN), Linhong Ji (CN) 255

Engineering of complex systems
Systems of objectives in complex product development
Albert Albers (DE), Bjoern Ebel (DE), Quentin Lohmeyer (DE) 267
Perspectives for the usage of design and modelling languages in mechatronic systems development
Alfred Sadlauer (AT), Peter Hehenberger (AT), Klaus Zeman (AT) 279
**Towards handling complexity** - Testing the IPEM process modeling approach  
*Albert Albers (DE), Andreas Braun (DE)*  
293

Development of industrial visualization tools for validation of vehicle configuration rules  
*Anna Tidstam (SE), Lars-Ola Bligård (SE), Knut Åkesson (SE), Alexey Voronov (SE), Fredrik Ekstedt (SE), Johan Malmqvist (SE)*  
305

**Computational support of engineering**

Adapting discrete-event simulation tools to support tactical forecasting in the automotive industry  
*Adrian Steinemann (CH), Joachim Taiber (US), Georges Fadel (US), Konrad Wegener (CH), Andreas Kunz (CH)*  
319

World-wide distributed computing for high-energy physics experiments  
*Dario Barberis (CH)*  
333

Forecasting application by using three dimensional cellular neural network  
*Basak Akdemir (UK), Reza Ziarati (TR), Erdem Bilgili (TR), Martin Ziarati (UK)*  
345

A numerical method for investigating mixed lubrication phenomena  
*Albert Albers (DE), Benoît Lorentz (DE)*  
357

**3 KNOWLEDGE INTENSIVE ENGINEERING**

**Human factors in design**

Statistical analysis of foot shapes for designing mass-customized footwear  
371

Virtual ergonomics to design auxiliary equipment for commercial refrigeration  
*Giorgio Colombo (IT), Daniele Regazzoni (IT), Caterina Rizzi (IT)*  
383

A pilot study to investigate time pressure as a surrogate of being in haste  
*Elizabeth Rendon-Velez (NL), Imre Horváth (NL), Wilhelm Frederik van der Vegte (NL)*  
393

Advanced systems engineering - Towards a model-based and human-centered methodology  
*Albert Albers (DE), Quentin Lohmeyer (DE)*  
407

**Virtual reality application**

A realistic portable tactile haptic device  
*Shana Smith (TW), Greg Smith (TW), Ji-Liang Lee (TW)*  
417

Assembly sequence validation with an augmented reality authoring tool  
*Gilberto Osorio-Gómez (CO), Roberto Viganò (IT)*  
431

Designing natural user interfaces for commercial 3D modelling software  
*Zoltán Rusák (NL), Ismail Cimen (CH), Imre Horváth (NL), Aadjan van der Helm (NL)*  
441

Development of scenarios and contents with augmented reality in a regional museum  
*Bo-Rum Lee (KR), Ki-Sup Lim (KR), Tae-Min Kim (KR), Joo-Pyo Hong (KR), Bok-Hee Song (KR)*  
455
Knowledge engineering and ontologies

Improving access to micro-specific knowledge with an ontology
Albert Albers (DE), Tarak Turki (DE), Hannes Schmalenbach (DE) 465

An extended, integrated model of designing
Belgavkar Sudhindra Rao Chita Ranjan (IN), V. Srinivasan. (IN),
Amaresh Chakrabarti (IN) 477

Modeling detailed design knowledge based on extended structure-behavior-function model
Yong Chen (CN), Jian Huang (CN) 491

Product data exchange security processes based on trust and rights management
Joselito Rodrigues Henrques (DE), Diana Völz (DE), Reiner Anderl (DE) 503

Interaction and emotional engineering

Analysis of the formation of user impressions upon tactile interaction with product design materials
Georgi Georgiev (JP), Yukari Nagai (J), Toshiharu Taura (JP) 515

Constrained 3D sketching with haptics and active motion annotation
Prasad S. Onkar (I), Dibakar Sen (IN) 527

Capturing the aesthetic design intention in product design
Sitaram Soni (IN), Pritee Khanna (IN), Puneet Tandon (IN) 541

Collaborative knowledge transfer

MDM for assessing product variety and production concepts
Antti Pulkkinen (FI), Jaana Kuusela (FI), Petri Huhtala (FI), Asko Riitahuhta (FI) 553

Multi-user computer aided prototypes
Edward Red (US), C. Greg Jensen (US), Prasad Weerakoon (US), David J. French (US),
Steven E. Benzley (US), Karl G. Merkley (US) 563

State of the art of virtual engineering based human-machine system lifecycle knowledge transfer and management
Simo-Pekka Leino (FI), Asko Riitahuhta (FI) 573

Design and manufacturing of appearance materials based on BRDF measurements
Duck Bong Kim (KR), Hyuk Jin Kwon (KR), Kwan H. Lee (KR) 587

Lifelong engineering education

ME 444: Redesigning a toy design course
Elkin Taborda (CO), Senthil K Chandrasegaran (US), Karthik Ramani (US) 597

Development of a ubiquitous language learning platform
Loek Canton (NL), Camilo Vieira (CO), Elkin Taborda (US), Alvian Siswoyo (US),
Niels CCM Moes (NL) 609

An advanced design course on ubiquitous systems: evoking radical innovations using moblogging and ubiquitous learning
Regine W. Vroom (NL), Bart H.M. Gerritsen (NL), Imre Horváth (NL), Zoltán Rusák (NL),
Bram de Smit (NL), Eliab Z. Opiyo (NL) 623
Understanding the communication context of successful high-tech new product development
Nusa Fain (UK), Ahmed Kovacevic (UK), Sara Jones (UK) 637

4 ENHANCEMENT OF PRODUCTS AND WORKFLOWS 647

Shape modeling in applications
Sharp edge filleting of enriched finite element meshes
Ruding Lou (FR), Jean-Philippe Pernot (FR), Franca Giannini (IT), Alexei Mikheevitch (FR), Philippe Véron (FR), Bianca Falcidieno (IT), Raphaël Marc (FR) 649

Categorization of CAD models based on thin part identification
Jean-Philippe Pernot (FR), Franca Giannini (IT), Cédric Petton (FR) 661

Sensitivity analysis of optimized curve fitting to uniform-noise point samples
Oscar Ruiz (CO), Camilo Cortés (CO), Diego Acosta (CO), Mauricio Aristizabal (CO) 671

An approach to modeling Internal shapes of ships to support collaborative development
Herbert J. Koelman (NL) 685

Engineering modeling of artifacts
Modeling fibrous porous media with periodic surfaces
Wei Huang (US), Yan Wang (US), Sima Didari (US), Tequila A.L. Harris (US) 697

Complex parts modeling method in parametric CAD systems
Yannick Bodein (FR), Bertrand Rose (FR), Emmanuel Caillaud (FR) 711

An object-oriented information model for the representation of free form sheet metal parts in integral style
Oliver J. Weitzmann (DE), Anselm L. Schüle (DE), Thomas H. Rollmann (DE), Reiner Anderl (DE), Thea Göllner (DE) 725

Deriving functional properties of components from the analysis of digital mock-ups
Ahmad Shahwan (FR), Gilles Foucault (FR), Jean Claude Léon (FR), Lionel Fine (FR) 739

Engineering optimization of products
Mould design process in high pressure die casting supported by virtual prototyping
Roberto Raffaeli (IT), Claudio Favi (IT), Ferruccio Mandorli (IT) 753

Optimization methods for mechanism synthesis: A comparison
Jonathan Feldman (UK), Ben J. Hicks (UK), Glen Mullineux (UK) 767

Computer-based finite element modelling techniques for tennis racket string-beds
Alexander J. Kelly (UK), Rod M. Valentine (UK), Glen Mullineux (UK) 777

Modeling chemical vapour infiltration of SIC composites
Yaochan Zhu (DE), Eckart Schnack (DE), Gabriela Iancu (DE), Aijun Li (CN) 787

Challenges of energy engineering
Building the design space of an electrostatic chuck used in the plasma-etching process
Yuchun Sun (CN), Linhong Ji (CN), Yuemin Hu (CN), Jia Cheng (CN) 797

A method of disturbance source localization in a power system
Galina Lysenko (RU) 811
Modeling aspects of hyper-complex products in nuclear engineering projects
Alexander Sharmazanashvili (CH) 821

Industrial workflow enhancement
Product development process with multiple partners: Dependencies between activities
Driss Essabbar (FR), Marc Zolghadri (FR), Maria Žrikem (MA),
Abderrachman Ayadi (MA) 831

2D/3D technical documentation navigation using natural interaction and augmented reality for maintenance
Rafael Radkowski (DE), Michele Fiorentino (IT), Antonio Emmanuele Uva (IT) 841

Shifting of product management strategy for optimizing engineer-to-order product leadtimes
Aïcha Amrani (FR), Marc Zolghadri (FR) 851

Genetic algorithm used for planning and scheduling in batch production
Aleš Slak (SI), Jože Tavcar (SI), Jože Duhothnik (SI) 865

Enhancement of company output
Anti-counterfeiting based on product authentication with product-related data
Michael Abramovici (DE), Andreas Krebs (DE) 879

The role of testing in the engineering product development process
Khadija Tahera (UK), Christopher Earl (UK), Claudia Eckert (UK) 893

Towards multidisciplinary modeling and simulation: Interoperability issues and challenges for mechatronic engineering
Jérémy Lefèvre (FR), Sébastien Charles (FR), Magali Bosch-Mauchand (FR),
Benoît Eynard (FR), Éric Padiolleau (FR) 905

DFMA implementation in high variability product context
Tommi Lahtinen (FI), Jani Berkovits (FI), Asklo Riitahuhta (FI) 915

5 ADVANCED ENGINEERING APPROACHES 927

Design optimization methods
Geometrical and aerodynamic enhancement analysis of a bird-like wing for improving efficiency and less cost
Ramy Harik (LB), Alipio Nicolas (LB), Mohamed Dassouki (LB), Alain Bernard (FR) 929

EROD: A web-based system to support the design process of eco-efficient electric motors
Marco Marconi (IT), Claudio Favi (IT), Michele Germani (IT), Maura Mengoni (IT) 939

Designing an innovative bass guitar bridge
Robbie Michiel Langendijk (NL), Niels C.C.M. Moes (NL) 951

A simplified tool to support design, sales and customer interaction for complex forming shoulder design
Glen Mullineux (UK), Ben J. Hicks (UK) 963
Product development methodologies

Using scenarios for product development – Overview and experiences
Andreas Siebe (DE), Alexander Fink (DE), Albert Albers (DE) 973

Bridging the gap between product design and product manufacturing by means of graph-based design languages
Peter Arnold (DE), Stephan Rudolph (DE) 985

Bulk simulation of using information-intensive products and product-service systems: Formal underpinnings
Wilhelm Frederik van der Vegte (NL), Imre Horváth (NL) 999

Reliability analysis module development for production route elaboration
Marina Pribytkova (EE), Jevgeni Sahno (EE), Tatyana Karaulova (EE, Eduard Shevtshenko (EE), Meysam Maleki (PT), V. Cruz-Machado (PT) 1013

Robust decision making

Product property margins: A critical underlying problem in engineering design
Claudia Eckert (UK), Christopher Earl (UK), Ola Isaksson (SE) 1027

A method for identifying locations of knowledge as a preparation of the knowledge acquisition within the development of multi-agent design systems
Martin Kratzer (DE), Hansgeorg Binz (DE), Daniel Roth (DE) 1041

Effectiveness of simulations in decision making: Preliminary studies on CFD as a tool for aneurism
Simone Bartesaghi (IT), Giorgio Colombo (IT), Neri Alamanni (IT), Marco Lotti (IT) 1053

A new method for management of human resources in product development
Biljana Marković (RS), Albert Albers (DE), Norbert Burkardt (DE), Vojislav Miltenović (RS), Milan Banić (RS) 1067

Design and innovation theories

Analysis and model of systematic innovation for design
Qiang Zhang (FR), Ioana Deniaud (FR), Emmanuel Caillaud (FR), Claude Baron (FR) 1081

Design theory design: A new attempt
Vladimir Sedenkov (BY) 1093

Integral design and C-K theory combined to support creativity
Wim Zeiler (NL) 1105

Specific topics of engineering

Ontology-grounded test facility requirements definition
Mohanad El-Haji (DE), Thomas Freudenmann (DE), Albert Albers (DE), Frank Gauterin (DE) 1113

A framework to link product configuration and CAD automation
Roberto Raffaeli (IT), Maura Mengoni (IT), Michele Germani (IT) 1125

Acoustic investigation of novel saxophone mouthpieces produced by additive manufacturing
Eugeni Doubrovski (NL) Jouke Verlinden (NL), Jo Geraeds (NL), Imre Horváth (NL), Vera L.M. Konietzchke (NL) 1139
Development of a virtual wind-tunnel
Zoltán Horváth (HU), Tihamer A. Kocsis (HU), Gábor Takács (HU), Louis Komzsik (US) 1147

Advancements in architectural construction
Free form composite stressed skin sandwich roofs
Mick Eekhout (NL) 1157

General purpose building layout generator
Jacobsen Jan Bijker (ZA), Elizabeth Marie Ehlers (ZA) 1167

User-centred method for inclusive design of home environments
Silvia Ceccacci (IT), Michele Germani (IT), Maura Mengoni (IT) 1179

Human in the loop through wireless sensor networks: Smart grids for comfort
Wim Zeiler (NL), Gert Boxem (NL), Derek Vissers (NL), Rick Maaijen (NL) 1191

6. FORUM PAPERS 1203

Assessing industrial impacts
Assessing the industrial impact of interactive augmented prototyping in several abstraction levels
Jouke Verlinden (NL), Eugeni Doubrovski (NL), Imre Horváth (NL) 1205

Approach and tools to design an efficient and flexible production flow and human centred workstations in SMEs
Gu van Rhijn (NL), Michiel de Looze (NL), Peter Vink (NL) 1215

Technology transformation as a new paradigm for design engineering research
Erik Tempelman (NL), Joris S. M. Vergeest (NL), Prabhu V. Kandachar (NL), Christos Spitas (NL) 1221

Can design evaluation tools predict/prevent change propagation?
Prabhu Shankar (US), James Matheison (US), Raveesh Ramachandran (US), Joshua D. Summers (US), Gregory M. Mocko (US) 1235

Geometry implied reasoning
Geometric reasoning for manufacturability evaluation
Ashish Gupta (IN), Yagnanarayanan Kalyanaraman (IN), Nagarajan Sethuraman (IN) 1251

An exploration of the user role in product ideas containing ubiquitous technologies to elaborate on design support tools
Regine W. Vroom (NL), Imre Horváth (NL), Zoltán Rusák (NL), Bram de Smit (NL), Eliab Z. Opiyo (NL) 1265

Mobile mixed reality and objective human factors evaluation to accelerate the design of work stations
Michiel De Looze (NL), Gu van Rhijn (NL), Tim Bosch (NL) 1277

Development of 3D CAD simulation models for virtual commissioning
Anton Strahilov (DE), Marina Mrkonjić (DE), Jens Kiefer (DE) 1281
Towards competitive products
Design issues of IC equipments and solutions
Yuemin Hou (CN), Linhong Ji (CN) 1289

Ubiquitous curtain-wall assembly-support by mobile computing and total station
Leon Kos (SI), Simon Kulovec (SI), Jože Dušovnik (SI), Viktor Zaletelj (SI) 1293

Super slender glass façades of InHolland Polytechnic, Delft
Mick Eekhout (NL) 1299

Applying patterns for design method representation
Tobias Deigendesch (DE), Albert Albers (DE) 1311

Various topics of engineering
Requirements in engineering design: What are we teaching?
Shraddha Joshi (US), Beshoy Morkos (US), Prabhu Shankar (US),
Joshua D. Summers (US), Gregory M. Mocko (US) 1319

Clustering designer’s mental activities based on EEG power
Thanh An Nguyen (CA), Yong Zeng (CA) 1327

Modeling of interpenetrated metal-ceramic composites under high thermomechanical loads
Gabriela Iancu (DE), Eckart Schnack (DE), Yaochan Zhu (DE) 1335

Forum presentations on engineering
Ergonomic assessment using digital human models - A new German guideline
Gert Zülch (DE) 1339

Statistical analysis of aircraft maintenance operations using design of experiments
Mehmet Savsar (KW), Fawaz Abdulmalek (KW) 1347

Body optimization - A new approach for education
Lau Langeveld (NL) 1357

Interaction for shape design - Terms used and their effectiveness
Tjamme Wiegers (NL), Joris S.M. Vergeest (NL) 1371

7 LATE ARRIVALS
Surprises in design and by designing
Vasilije Kokotovich (AU) 1383

8 AUTHOR INDEX 1395

Author index 1397
Foreword

Every TMCE Symposium features a kind of duality. This is the result of the intension of the Program Committee to pay balanced attention to the latest theories, methodologies, systems and tools that can enhance the potentials and efficiency of competitive engineering, and to a novel, or just emerging, domain of research and development that may play an important role in the enhancement of the competitiveness of product and service engineering in the near future. For TMCE 2012, the domain of mobile communication and ubiquitous computing technologies has been selected as an additional domain of interest. Actually, mobile and ubiquitous technologies have already proved their ‘raison d'être’ and demonstrated their possible impacts on global product development and production processes. Studying the related phenomena, generating disciplinary insights and discoveries, and exploring knowledge for practical enhancement are important for academic research, industrial product development and commercial application.

Mobile and ubiquitous technologies include multiple families of information mining, sensing, transmission and communication, networking, conversion, reasoning and actuator technologies, which lend themselves to the realization of smart, context sensitive, and adaptive systems and services. They facilitate the implementation of new functioning paradigms, such as cooperative problem solving, situated reasoning, and self-reconfiguration. They have been used to support geographically distributed, knowledge-intensive and collaborative product development and production processes. The influence of these technologies will even be higher in the near future when they reach their next stage of maturity and the methodological principles of designing and engineering complex, distributed, smart, and proactive systems will be known. They are paving the way to the next-generation of cyber-physical systems.

So as in the preceding years, the Program Committee commenced with a very large number of submitted abstracts, out of which only those were accepted as basis of full-length papers that focused either on the traditional assets of competitive engineering or on the possible engineering applications of mobile communication and ubiquitous computing technologies. The submitted full-length papers and short/extended technical notes were carefully studied by the Program Committee, and some 140 manuscripts were sent to peer reviewers. A lot of constructive comments were fed back to the authors by the peers and by the Program Committee. In the end, 92 technical papers have been accepted for publication in these printed Proceedings in full length. In addition, six invited survey and tutorial papers have been included. The contributed forum papers and technical notes have been included in full length in the digital (flash drive) Proceedings of TMCE 2012. Each of the published survey, research, and application papers offers some novel scientific and/or engineering work and results. A large part of them will be republished in special issues of international design and engineering journals after the necessary adaptations.

We offer these Proceedings to industrial product designers, engineers and managers, as well as to academic researchers, educators and students as a high quality state of the art survey of virtual engineering and as a useful reference in terms of the theories, methodologies, systems and best practices. Many papers also point towards probable and promising future research opportunities and possible developments. For this reason, these Proceedings can also be
useful for research funders, governmental policy makers, industrial managers and consultants. We think the contributing authors did an excellent job and we are very grateful for their contribution, as well as for their helpful cooperation in the paper review and revision process. Without their outstanding scientific work and results, the International TMCE 2012 Symposium could not be so successful and these Proceedings could not be so valuable.

We are also very grateful for the constructive comments and proposals of the peer reviewers. Their names are mentioned in the Members of the International Paper Review Panel section. We are especially indebted to our colleagues who contributed to the Symposium not only as members of the Organizing Committee, but also as lead authors and co-authors. Their names are mentioned in the last section of this Foreword. Finally, we highly appreciate the support of the premium sponsor, the Parametric Technology Corporation Germany, Germany, the co-premium sponsor, the Shaeffler KG., Germany, the sponsor, the Emerald Eye R & C Company, the Netherlands, the Delft University of Technology, Delft, the Netherlands, and the Karlsruhe Institute of Technology, Karlsruhe, Germany.

MEMBERS OF THE ORGANIZING COMMITTEE

Executive chairman Prof. Dr. Imre Horváth
Executive chairman Prof. Dr. Albert Albers
General secretary Dr. Zoltán Rusák
General secretary Dr. Matthias Behrendt
Financial matters Dr. Eliab Z. Opiyo
Technical matters Dr. Wilhelm Frederik van der Vegte
Technical matters Dipl.-Ing. Ute Rietschel
Technical matters Mrs. Elizabeth Rendon-Velez
Technical matters Ir. Kanter van Deurzen
Financial administration Mrs. Ingrid Schut-Feijge
Web management Mr. Adrie Kooijman

MEMBERS OF THE PROGRAM COMMITTEE

Program coordination Prof. Dr. Imre Horváth
Program coordination Prof. Dr. Albert Albers
Review management Dr. Zoltán Rusák
Review management Dr. Matthias Behrendt
Invitation management Dr. Eliab Z. Opiyo
Registration management Mr. Adrie Kooijman
1 INVITED PAPERS
2 UBIQUITOUS SYSTEMS ENGINEERING

Smart agent technologies
Exploiting ubiquitous technologies
Enabling ubiquitous applications
Explorative knowledge technologies
Engineering of complex systems
Computational support of engineering
3 KNOWLEDGE INTENSIVE ENGINEERING

Human factors in design
Virtual reality application
Knowledge engineering and ontologies
Interaction and emotional engineering
Collaborative knowledge transfer
Lifelong engineering education
ENHANCEMENT OF PRODUCTS AND WORKFLOWS

Shape modeling in applications
Engineering modeling of artifacts
Engineering optimization of products
Challenges of energy engineering
Industrial workflow enhancement
Enhancement of company output
5 ADVANCED ENGINEERING APPROACHES

Design optimization methods
Product development methodologies
Robust decision making
Design and innovation theories
Specific topics of engineering
Advancements in architectural construction
6 FORUM PAPERS

Assessing industrial impacts
Geometry implied reasoning
Towards competitive products
Various topics of engineering
Forum presentations on engineering
7 \textit{LATE ARRIVALS}
